## Food Allergy/Restriction Questionnaire

In order to ensure the safety of your child at school and assist the classroom teacher, we would like to ask you to complete in as much detail as possible, information regarding foods that your child may have for snack and what foods your child must absolutely avoid. Please be advised that this information will be shared with appropriate school personnel for the safety of your child.

If your child is allergic to nuts please specify which nuts they need to avoid and if there are any nuts they can safely eat. For example, allergy to walnuts and almonds but can have pecans and peanuts.

If your child is allergic to fruits please specify if it is the actual fruit only or if the allergy is to all forms of the fruit. Are artificial flavorings of the fruit acceptable? For example, allergy to apples but can have apple juice, applesauce or apple-flavored candy.

Please specify if the food product they are allergic to needs to be avoided all together or if a certain quantity is acceptable. For example, allergy to milk but can have 2 oz. a day of chocolate milk.

Finally, please provide us with suggested snacks that you normally would provide at home; be very specific about what your child must avoid. If we have this information on file we can then compile a list of what food products need to be avoided in each classroom.

Student name	Grade
Food allergy/restriction to	1
Avoid food totally or limit the amount?	
May have a limited amount (be specific)	
My child may be in the same room with other child	lren eating this food product? Yes No
My child must avoid the following prepared foods & baked goods	
Snacks that my child can eat (be specific)	
My child is allowed to self select items from the ca If the above answer is no, then you will need to pac	afeteria and knows his/her restrictions? Yes ☐ No ☐ ck a lunch for your child daily.
When my child has a reaction to eating this food yo	ou will see these symptoms
Medications necessary to treat my child's reaction	to this food allergy are
	york needs to be completed by you and your child's doctor.
Yes No My child has been desensitized or a strength of No	no longer has a food allergy and medication is not required d its employees harmless should any problems arise.
