### Notes and Definitions

| Item  | Definition                                                |
|-------|-----------------------------------------------------------|
| D     | Analyte was reported from a dilution run.                 |
| (Dig) | For metals analysis, sample was digested.                 |
| [2C]  | Reported from the second channel in dual column analysis. |
| DF    | Dilution Factor                                           |
| MDL   | Method Detection Limit.                                   |
| ND    | Analyte was NOT DETECTED at or above the detection limit. |
| NR    | Spike/Surrogate showed no recovery.                       |
| Q     | Qualifier                                                 |
| RL    | Reporting Limit                                           |
| Wet   | Sample is not dry weight corrected.                       |

Measurement of uncertainty and any applicable definitions of method modifications are available upon request. Per EPA NLLAP policy, sample results are not blank corrected.

EMSL maintains liability limited to cost of analysis. Interpretation and use of test results are the responsibility of the client. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. The report reflects the samples as received. Results are generated from the field sampling data (sampling volumes and areas, locations, etc.) provided by the client on the Chain of Custody. Samples are within quality control criteria and met method specifications unless otherwise noted.
